Kb88811 Microsoft Sp3

I signed an ASUS p4000 system and re-installed XP from a XP PRO with SP3 CD-rom. The Realtek sound driver would not install with the error message: 'driver missing' Office XP Service Pack 3 (SP3) provides the latest updates to Microsoft Office XP. I downloaded and tried to install Kb888111 and got the message 'Setup had detected that the Service Pack version of this system is newer than the update you are applying. There is no need to install this update. The UAA files from KB 88111 are not on the hard drive. According to KB946480 the Kb888111 beta fix is included. SP3 contains significant security enhancements, in addition to stability and performance improvements.
